Advice to All Parents/Carers - following a single case of Covid 19

Dear Parents/Carers,

We have been advised that there has been a case of COVID-19 within the school/setting.

Acting on local public health advice, we have contacted affected parents/carers separately today, to ask them to collect their child and begin to self isolate.

We know that you may find this concerning but we are continuing to monitor the situation and are working closely with Public Health to manage the situation. This letter is to inform you of the current situation and provide advice on how to support your child. Please be reassured that for most people, coronavirus (COVID-19) will be a mild illness.

The small number of children who have been in direct, prolonged contact with the confirmed case will have received an individual letter and will be staying at home for 10 days. (This is based on two positive lateral flow tests. We are currently waiting for the results of a confirmatory PCR test. We will update the **affected parents** when we hear more and if the PCR test result is negative, any affected pupils / staff will not need to continue to self isolate.)

The school remains open and **your child should continue to attend if they remain well.**

Further Information:

Further information is available the information sheet on the next page and by using the following link: <https://www.nhs.uk/conditions/coronavirus-covid-19/>

Yours sincerely,

Adam J.G. Campbell
Headteacher

Further information

What to do if your child develops symptoms of COVID 19

If your child develops symptoms of COVID-19, they must not come to the school/setting and should remain at home for at least **10 days** from the date when their symptoms appeared. Anyone with symptoms will be eligible for testing and this can be arranged via <https://www.nhs.uk/ask-for-a-coronavirus-test> or by calling 119.

All other household members who remain well must stay at home and not leave the house for **10 days**.
<https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance/stay-at-home-guidance-for-households-with-possible-coronavirus-covid-19-infection>

The 10-day period starts from the day when the first person in the house became ill.

Household members should not go to work, school or public areas and exercise should be taken within the home.

Household members staying at home for 10 days will greatly reduce the overall amount of infection the household could pass on to others in the community

If you are able to do so, move any vulnerable individuals (such as the elderly and those with underlying health conditions) out of your home, to stay with friends or family for the duration of the home isolation period

Symptoms

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- a new continuous cough and/or
- a high temperature
- a loss of, or change in, normal sense of taste or smell (anosmia)

For most people, coronavirus (COVID-19) will be a mild illness.

If your child or anyone in the household does develop symptoms, you can seek advice from NHS 111 at <https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus-symptoms/> or by phoning 111.

How to stop COVID-19 spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19

Do

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards
